PROJECT DESCRIPTION

City of Oakland Park is responsible for the uninterrupted delivery of safe potable water through the maintenance and repair of 197 miles of water mains, and over 9,000 water services, as well as, for the maintenance of 1,247 drainage structures and 89,965 linear feet of drainage pipe. This includes periodical repairs and replacement of existing drainage systems to insure efficient operations.

SERVICES PERFORMED

Installation of 1545 LF of 4' H x 8' W exfiltration trench with 24" PHDPE pipe from Prospect Road to SR 811. Catch basin structures with overflow weirs and drainage pipes were installed and connected to the exfiltration trench system. Work included reconstruction of roadway and driveways with applicable striping, relocation of municipal utilities, installation of 1810 LF new water main, removal and abandonment of existing mains, and sod restoration.

COMPLETION DATE

2006

PROJECT COST
