 Contract No: 6000000050/C733 jguardia@sfwmd.gov

PROJECT DESCRIPTION

South Florida Water Management District operates and maintains approximately 1,800 miles of canals and levees, 25 major pumping stations and about 200 larger and 2,000 smaller water control structures. After the storms of '04 and '05 ravaged the South Florida canal system, many of these canals were stressed beyond their limits and rehabilitation became critical.

SERVICES PERFORMED

The work consists of furnishing all materials, labor, tools and equipment required to repair approximately 3.8 linear miles (20,300 LF) of the C-24 canal banks. The repair of will include removal of existing vegetation, backfill and compaction of the banks to 2H:1V slopes, sodding, installation of (19,760 LF) turf reinforcement mat in repaired areas and 540 LF of rubble riprap, and performing all other appurtenant and collateral work necessary to complete all work required by the Contract Documents.

COMPLETION DATE

2007

PROJECT COST

\$ 1,249,000
